

Supa-Seal[®]

HYGIENE LININGS

HYGIENIC, SEAM FREE, WASHABLE VAN CONVERSIONS & LININGS

Supa-Seal Hygienic Washable van and vehicle linings are ideal for the safe transportation of food products, clinical waste, toxic waste, chemicals, pharmaceuticals, hazardous waste, medical waste, animal carriage, sanitary disposal, pest control and much more. **Supa-Seal** linings will help your company to ensure health and hygiene situations are handled and managed safely to protect the operators and the environment.

QUALITY SOLUTIONS FOR QUALITY CONSCIOUS CUSTOMERS

DESIGN FREEDOM

Our seam free laminated interiors are designed to YOUR exact requirements. Our technical sales team have over 50 years of expertise in building high specification, environmentally tough vehicles and can advise on the best materials available for individual specifications, no matter what your needs may be.

STRENGTH & DURABILITY

The high weight to strength ratio and unrivalled flexural strength of our design, means our glass reinforced resin finish is pound for pound stronger than steel and built to last. Its final coating of special wax impregnated resin offers the easiest to clean finish, which is totally impervious to liquids, including most acids, and is resistant to bacteria and mould.

CORROSION & ENVIRONMENTAL PROTECTION

The finish is designed and manufactured to be highly resistant to environmental extremes, and has a much longer life expectancy when compared to a variety of construction materials; metal, wood or plastics. It's the preferred choice in vehicles and areas where exposure to harsh situations like extreme temperatures, salt air, chemicals including most acids or when in damp or very wet conditions.

Our **Supa-Seal** Hygiene linings are developed from our highly successful refrigerated vehicle conversions and are to Food safety standards. We have a range of products on offer from box bodies to coldstores as well as traditional van lining and the revolutionary IgluVan kit systems.

Over 50 years experience in the Refrigeration Industry means we have tried and tested almost every product available. We only offer the best:
